Kinga, Hungary

Be a democrat according to this:

"To be a democrat means, first and foremost, not to fear: not to fear those of different opinions, those of different languages, those of different races, revolution, conspiracies, the unknown evil intentions of the enemy, hostile propaganda, belittlement, and generally all those imaginary dangers which become real dangers precisely because we fear them."
(István Bibó)

Vince, Hungary

Try to make understand and listen to each other. Because this is how we can make a change.

Gabriella, Hungary

Be kind to yourself and others, nurture and protect those who need it

Sidorela, Albania

Every night, before I go to bed I think about what I could have done better that day.

I notice ethical/moral shortcomings, inefficiencies, bad habits. This practice equips me with knowledge to do better in the future, and improve overall.

I believe that whenever people take the time for self-reflection, the world becomes a better place.

Abel, Hungary
